Arbo 2020 is a unique three-part epoxy sealant, which cures to form a flexible, hard wearing seal with good resistance to traffic loads.

Arbo 2020 has good adhesion to concrete, many metals, glass and many other common construction substrates and can be colour matched to most colour requirements.

**MAIN APPLICATIONS**
Recommended for sealing floor joints in internal environments e.g. kitchens, food processing areas, retail outlets.

Can be used in the manufacture of pre-formed movement joints.

**NB**: Not recommended for use in high movement joints or where prolonged water immersion may occur.

Arbo 2020 should be pre-tested against natural stone before application into floor joints formed in natural stone (Please contact Adshead Ratcliffe Technical Services Department for more information).

**PACKAGING**
2.0 Litre Set, with a tin for the Base, 150 ml cartridge for the Curing Agent and sachet for the colourizer. Follower plate.

**STORAGE LIFE**
9 months in original unopened packaging stored in a cool, dry place out of direct sunlight

**COLOURS**
Grey, Black, Bright Red, Stone, Oatmeal, Maize, Buff, Light Brown. Other Colours can be colour matched – please contact Adshead Ratcliffe Technical Services Department for further information.

**NB**: Not available in White due to colour instability.
APPLICATION INSTRUCTIONS

Joint Preparation
The joint surfaces must be clean and free from all contamination. Surfaces should be degreased using the appropriate surface cleaner (contact Adshead Ratcliffe Technical Service Department for further information).

Mixing
The ratio of base, curing agent and colourizer controls the performance properties of Arbo 2020 and the product is filled off to an exact mixing ratio. It is vital therefore that the whole contents of the Curing Agent and Colourizer packaging are added to the Base tin. The 3 components must be thoroughly mixed to ensure complete homogeneity and colour dispersion.

Application
The normal method of application is to fill the mixed sealant into Arbo Barrel Guns using a heavy duty follower plate. The sealant should be extruded firmly into the joint by maintaining an even pressure on the trigger of the gun. All joint preparation, priming, and sealant application should be carried out in accordance with BS 8000 Part 16, the British Standard for the sealing of joints in buildings.

Joint Backing
Please use appropriate joint filler, e.g. closed cell polyethylene foam should be used to provide the correct joint depth. All joint preparation and sealant application should be carried out in accordance with BS8000 Part 16 (British standard for the sealing of joints in buildings).

Joint Size Suitability
Joint Width
Minimum 6mm
Maximum 25mm (single application); 50 mm (multiple applications)

Joint Depth
Minimum 10mm on porous substrates (12mm in floor joints)
Minimum 6mm on non porous substrates (12 mm in floor joints)
Maximum 25mm

Width: Depth ratio (within above min/max restrictions)
2:1 butt joints
1:1 lap/floor joints

HEALTH AND SAFETY
Base and Curing Agent require careful handling. Please consult MSDS’s for each component before use.

ACCESSORIES
Cleaners
Arbo Cleaner Type 17 - 1 litre Tin (Xylene based – not suitable for use with plastics or delicate finishes)
Arbo Cleaner 16 – 1 Litre Tin (Alcohol Based)

Equipment
Bulk Loading Guns
Heavy Duty Follower Plates
