Arbosil HM is a One-part High Modulus Acetoxy Cure Silicone Sealant, which cures rapidly on exposure to moisture vapour to form a resilient elastic silicone rubber. This product contains a fungicide to make it resistant to fungus and mildew. Arbosil HM bonds well to acrylic, ceramic, metal, glass and laminate surfaces, and will not discolor during its service life, whilst maintaining good elasticity.

**MAIN APPLICATIONS**

This product is recommended for the sealing around all types of sanitary fittings including baths, showers, urinals, sinks and wash basins in both domestic and commercial locations.

It is suitable for use in areas of high humidity.

Can be used as to seal around laminates and worktops.

Suitable for both interior and exterior use.

Use for sealing of aluminium sheets and components.

Use as an adhesive to bond PVC trims.

**NB:** It is not recommended for overpainting, or use against most metal surfaces particularly soft metals like brass or lead, and is not for use against natural stone. (Contact Adshead Ratcliffe Technical Services for advice on which product to use against these substrates).
APPLICATION INSTRUCTIONS

Joint Preparation
The joint surfaces must be clean, dry and free from all contamination and any loose materials. The surfaces should be degreased using the appropriate Arbo Cleaner. Primers may be required on some substrates. It is recommended that Adshead Ratcliffe Technical Services Department should be consulted and advice obtained with regard to the choice of primer for specific purposes.

Joint Backing
Where applicable, appropriate joint filler e.g. closed cell polyethylene foam, should be used to provide the correct joint depth.

Application
Arbosil HM is supplied in cartridges and can be applied into the joint using an Arbo Caulking Gun. All joint preparation, priming, and sealant application should be carried out in accordance with BS 8000 Part 16, the British Standard for the sealing of joints in buildings using sealants.

JOINT SIZE SUITABILITY

Joint Width
Minimum 6mm
Maximum 25mm (single application); 35mm (multiple applications)

Joint Depth
Minimum 10mm on porous substrates
Minimum 6mm on non-porous substrates
Maximum 15mm

Width: Depth ratio (within above min/max restrictions)
2:1 butt joints
1:1 lap joints

STORAGE LIFE
12 months in original unopened package stored in a cool, dry place out of direct sunlight. Protect from frost.

HEALTH & SAFETY
No particular health hazards are associated with this product but please consult Material Safety Data Sheet for full information.

PACKAGING
25 x 310ml plastic cartridges. Polyethylene nozzles are included in each box.

ACCESSORIES

Primers
Arbo Primer 2650 500ml tin (yield approximately 125 metres per tin)
Arbo Primer 2402 500ml tin (yield approximately 200 metres per tin)
Arbo Primer 2172 500ml tin (yield approximately 200 metres per tin)
Please refer to Adshead Ratcliffe Technical Services for which primers to be used with individual substrates.

Cleaners
Arbo Cleaner No. 15 - 500ml Tin  
(Ketone based - suitable for unpainted metal, concrete, brick and glass)
Arbo Primer 2650 500ml tin (yield approximately 200 metres per tin)
Arbo Primer 2172 500ml tin (yield approximately 200 metres per tin)
Please refer to Adshead Ratcliffe Technical Services for which cleaners to use.

Ancillary Equipment
Polyethylene Nozzles
Arbo Caulking Guns
Arbo Silicone Tooling Block
Latex Gloves
Two Ply Small Blue Wipes

SPECIFICATION COMPLIANCE

BS EN ISO 11600 F/G 20HM

Certified under the Harmonized European Standard EN15651. Please refer to separate Declaration of Performance for more details.
